

Nzinga Management Agency — Application Build Requirements

1. What Nzinga Represents

Nzinga Management Agency is a multi-niche talent management agency representing:

- Modeling
- Acting
- Sports & Athletics
- Influencing / Content Creation

An applicant should be able to select **one or multiple** representation categories.

For example, someone could apply for:

Modeling + Influencing

or

Acting + Sports & Athletics

They should have **one profile/account**, not separate applications for every category.

2. Public Application Should Be SHORT

This is very important.

I do **not** want the application to feel like a long corporate employment application.

Target approximately:

5–10 minutes for most applicants.

We should collect enough information to determine:

Who are they?

What do they do?

Are they potentially a fit for Nzinga?
What kind of representation are they seeking?
Do they have experience/work/media to show us?
Are there any representation conflicts?

We can collect detailed information later if we decide to move forward.

3. Application Flow

I want the application to generally follow:

Step 1 — Basic Information

- Legal First Name
- Legal Last Name
- Preferred/Professional Name
- Date of Birth
- Email
- Phone
- City
- State
- Country
- Current Market/Location
- Profile Photo

Optional:

- Middle Name
- Pronouns
- Website

The system should automatically calculate the applicant's age from DOB.

Step 2 — Representation Interest

Question:

What type(s) of representation are you interested in?

Allow multiple selections:

- Modeling
- Acting
- Sports & Athletics
- Influencing / Content Creation

This selection should control the rest of the application.

Conditional logic is extremely important.

If someone selects only Modeling, they should not have to answer 20 Acting or Sports questions.

If they select Modeling + Influencing, they see both relevant sections.

4. General Talent Questions

Everyone should answer a small number of questions:

What is your current experience level?

- New / Emerging
- Some Experience
- Experienced
- Professional
- Established

Tell us briefly about yourself.

Short paragraph.

What are your primary career goals?

Short paragraph.

What experience or accomplishments are you most proud of?

Short paragraph.

Why are you interested in representation with Nzinga?

Short paragraph.

That's enough for the initial application.

5. Conditional Modeling Section

Only display if Modeling is selected.

Collect:

- Height
- Clothing Size
- Shoe Size
- Hair Color
- Eye Color
- Modeling Experience
- Modeling Categories

Categories:

- Editorial
- Runway
- Commercial
- Print
- E-Commerce
- Beauty
- Lifestyle
- Fitness
- Swimwear
- Promotional
- Other

Uploads:

- Headshot
- Full-body photo

Optional:

- Portfolio
- Comp Card
- Website

Do not make detailed measurements mandatory during the initial application.

Things like bust/chest, waist, hips, inseam, etc. can be collected later during onboarding.

6. Conditional Acting Section

Only display if Acting is selected.

Collect:

- Acting Experience Level
- Acting Categories
- Acting Training/Experience
- Notable Credits
- Headshot
- Resume, if available
- Demo Reel, if available

Categories:

- Film
- Television
- Streaming
- Theater
- Commercial
- Voiceover
- Hosting
- Music Video
- Short Film
- Other

Don't require a massive filmography during the first application.

7. Conditional Sports & Athletics Section

Only display if Sports & Athletics is selected.

Collect:

- Primary Sport
- Position/Event/Discipline

- Current Team/Organization
- Current Competitive Level
- School/University, if applicable
- Years Competing
- Career Highlights
- Athletic Photo
- Highlight Reel, if available

Optional:

- Ranking
- Statistics
- Coach
- Athletic Resume

Detailed sport-specific statistics can be collected later.

8. Conditional Influencer / Content Creator Section

Only display if Influencing / Content Creation is selected.

Collect:

- Primary Platform
- Username/Handle
- Content Category
- Approximate Follower Count
- Approximate Average Views
- Content Description
- Previous Brand Partnership Experience

Content categories:

- Fashion
- Beauty
- Lifestyle
- Fitness
- Sports
- Gaming
- Entertainment

- Comedy
- Food
- Travel
- Music
- Education
- Technology
- Business
- Other

Platforms:

- Instagram
- TikTok
- YouTube
- Facebook
- X
- Twitch
- Snapchat
- Other

Do not make applicants enter a huge amount of social analytics.

Detailed analytics/media kits can be requested later.

9. Existing Representation / Conflict Questions

Everyone should answer:

Are you currently represented by another agency, manager, or representative?

Yes / No

If Yes:

- Agency/Manager Name
- Type of Representation
- Category
- Exclusive / Non-exclusive
- Brief explanation

Also:

Are you currently under any contract, exclusivity agreement, sponsorship, endorsement, management agreement, or other professional obligation that could affect your ability to work with Nzinga?

Yes / No

If Yes:

- Brief explanation
- Ability to upload documentation if requested

This is important for our qualification process.

10. Availability

Keep this short.

Where are you interested in working?

- Local
- Regional
- National
- International

Are you willing to travel?

Yes / No

Are you currently available for professional opportunities?

Yes / No

Any major scheduling restrictions?

Optional.

11. Social Media / Portfolio

Let applicants provide links:

- Instagram
- TikTok
- YouTube
- Website
- Portfolio
- Other

Uploads should be conditional by category.

Don't force everyone to upload 10 different documents.

12. ID Verification

For adults, collect a government-issued photo ID.

Do not collect SSN during the initial application.

If we need tax/financial information later, that should be handled during the appropriate onboarding/financial process.

13. MINORS / UNDER 18

This is a major requirement.

The system should automatically determine whether someone is under 18 based on DOB.

If 18+:

Normal application.

If under 18:

The applicant completes their portion, but the application should automatically trigger a **Parent/Legal Guardian workflow**.

Do NOT simply ask the minor to type their parent's information into the application.

Instead:

1. Minor submits their portion.
2. System asks for parent/guardian email.
3. System sends parent/guardian an invitation.
4. Parent/guardian creates/accesses their own secure verification process.
5. Parent/guardian provides required information.
6. Parent/guardian uploads government ID.
7. Guardianship documentation is collected if applicable.
8. Parent/guardian reviews the application.
9. Parent/guardian provides electronic consent/signature.
10. Application remains pending until guardian requirements are completed.

Parent/Guardian Information

- Legal First Name
- Legal Last Name
- Relationship to Applicant
- Email
- Phone
- Address
- Government ID
- Guardianship documentation if applicable
- Electronic signature/consent

The parent should have their **own authenticated workflow/account**, rather than the minor filling it out for them.

14. Final Applicant Questions

Keep these to three:

Why do you want Nzinga to represent you?

What are you hoping to accomplish over the next 1–2 years?

Is there anything else you would like us to know?

Then:

Electronic Signature

Date

Submit

15. VERY IMPORTANT: Application vs. Client Onboarding

I want the system designed as a **two-stage process**.

Stage 1 — Application / Qualification

This should be short.

Purpose:

Determine whether the prospect may be a good fit for Nzinga.

Collect:

- Basic information
 - Representation interests
 - Basic talent information
 - Relevant category information
 - Socials/portfolio
 - Basic availability
 - Existing representation/conflicts
 - ID
 - Parent/guardian information if minor
-

Stage 2 — Client Onboarding

Only happens if Nzinga decides to move forward.

This is where we can collect:

- Detailed measurements

- Full professional credits
- Detailed athletic statistics
- Detailed social analytics
- Media kits
- Additional documentation
- Detailed contact information
- Tax/financial information when appropriate
- Contract-related information
- Other information required for the client's specific representation

Do not put all of this into the initial application.

16. Backend / Client Lifecycle

The application needs to connect to the Nzinga client-management workflow described in the SOP.

At a high level:

Application Submitted

→ **Lead**

→ **Scouting / Qualification**

→ **Client Packet**

→ **Success Manager Validation**

→ **Contract Pending**

→ **Director Review**

→ **Active Client**

The application should NOT automatically make someone an active client.

Representation should only progress through the appropriate internal approval and contracting workflow described in the SOP.

17. Applicant Statuses

Please build statuses such as:

- New / Lead
- Under Review
- Qualification in Progress
- Qualified
- More Information Required
- Client Packet Pending
- Client Packet Review
- Contract Pending
- Director Review
- Active Client
- Declined
- Withdrawn
- Inactive
- Archived

These should be controlled internally.

18. One Person = One Profile

This is extremely important.

The database should be structured so that:

ONE PERSON

can have:

- Modeling Profile
- Acting Profile
- Sports Profile
- Influencer Profile

without creating duplicate accounts.

Example:

Jane Doe

Representation Interests:

- ✓ Modeling
- ✓ Acting
- ✓ Influencing

All of that should live under **one applicant/client record**.

If she later adds Athletics, we should be able to add the category to her existing profile.

19. Duplicate Detection

Before creating a new applicant, the system should check for an existing profile using information such as:

- Email
- Phone
- Name
- Date of Birth

If an existing profile is found, the system should avoid creating a duplicate record.

20. Admin / Scouting Agent View

When a new application comes in, the Scouting Agent should be able to quickly see:

Applicant

Name
Age
Location
Application Date
Status

Representation

Modeling / Acting / Athletics / Influencer

Quick Profile

Experience
Goals
Availability
Travel
Socials

Documents

ID
Headshot
Portfolio
Reel
Other

Flags

Existing representation
Missing information
Minor / Guardian pending
Other issues

Then the Scout can begin the qualification process and build the Client Packet.

21. Permissions

Please follow the SOP regarding what each role can and cannot do.

The Scouting Agent should be able to:

- Review applications
- Contact prospects
- Request additional information
- Update prospect information
- Document communication
- Qualify prospects
- Build Client Packets

The Scouting Agent should NOT be able to:

- Promise representation

- Guarantee bookings
- Offer contracts
- Negotiate representation terms
- Approve final representation
- Skip required approvals

The Success Manager should handle the appropriate validation/review workflow.

Director approval should remain part of the final representation process.

22. Documents

Uploaded documents should be associated with the applicant/client record.

Each document should have:

- Document Type
- Upload Date
- Uploaded By
- Status
- Expiration Date if applicable
- Internal Notes

Examples:

- Government ID
 - Parent/Guardian ID
 - Guardianship Documentation
 - Headshot
 - Full-body photo
 - Resume
 - Demo Reel
 - Highlight Reel
 - Portfolio
 - Media Kit
-

23. Communication Tracking

The system should allow our team to document prospect/client communications.

For each communication:

- Date
- Time
- Method
- Staff Member
- Summary
- Follow-up Needed
- Follow-up Date

This will help us follow the SOP's communication and documentation requirements.

24. Mobile First

This is extremely important.

A lot of talent will apply from their phones.

The application should:

- Work extremely well on mobile
 - Have large/simple input fields
 - Make uploading photos/videos easy
 - Have progress indicators
 - Allow applicants to save and continue
 - Avoid unnecessary typing
 - Avoid huge pages
 - Clearly show required vs optional fields
-

25. Design Philosophy

I want the public application to feel like a **premium talent agency submission**, not:

- A rental application
- A job application
- A government form
- A giant questionnaire

It should feel modern, clean, aspirational, and easy.

The applicant should feel:

"This is an opportunity to introduce myself to a professional management agency."

Not:

"Why am I filling out 70 questions just to apply?"

26. Most Important Requirement

Please use the **Nzinga MGMT SOP I am sending you as the source of truth for our business process.**

This message is specifically describing how I want the **application and software workflow** to interact with that SOP.

The public application should be **short**.

The internal Nzinga system can be **much more detailed**.

The ideal structure is:

PROSPECT

- Simple Application
- Qualification
- Client Packet
- Internal Validation
- Contract
- Director Approval
- Onboarding
- Active Client
- Ongoing Client Management

I want the software architecture built so we can grow this later without having to rebuild the whole system.

Main thing: please don't make the public application too long. Use conditional questions and collect detailed information later once we actually decide we're interested in representing someone.
